SUMMARY

Front-end web developer with full-stack experience. Successfully developed web applications that were used by very large and consistently profitable clients. Excited about creating impactful web applications and approaching challenges from different perspectives. Passionate about developing responsive websites with visual impact.

EDUCATION

Bachelor of Science in Computer Science, 2018

University of California, Santa Barbara – Santa Barbara, CA

Certificate of Completion in Full Stack Development

Coding Bootcamp – University of Arizona, AZ

SKILLS

HTML, CSS, JavaScript, Node.js, SQL Server, C++, C#, Visual Studio Code, Visual Studio, MVC, VB.NET, excellent communication and collaborative skills, works well independently, curious and passionate coder

EXPERIENCE

Software Developer Engineer: Yardi Systems Inc. Jul 2018 – Jan 2021

Full stack development with the .NET framework. Used the ASP.NET Web Forms and ASP.NET MVC models to create dynamic web pages. Used SQL Server to create backend solutions. Used Yardi's proprietary SSRS language to produce reports. Used ETL to import data objects in bulk from CVS files. Extensively used the Visual Studio IDE

- Designed schema and dynamic web pages for clients managing single family homes.
- Used ETL to import large amounts of data and created applications for bulk data conversion for clients managing single family homes.
- Refactored and maintained Code for clients managing military housing.
- Used a Proprietary SSRS language to produce reports for clients managing military housing and single family homes.

ADDITIONAL RELEVANT EXPERIENCE

- Received a college grant to attend a Stanford workshop called "Designing Musical Games :: Gaming Musical Design."
- Participated in the 2015 AMC-ICPC regional programming competition.
